

# Preliminary Programme - Inaugural Conference

## Paris, March 10, 2016

08.00	Coffee and registration, software demonstrations including the InSite clinical research platform, interoperability asset register, EHR system certification tools, project videos, posters	
09.00	Opening welcome, Introduction to i~HD	<b>Dipak Kalra</b> , President i~HD <b>Georges De Moor</b> , Chair i~HD Advisory Board
09.20	<b>Keynote talk</b>	<b>Raphaël Beaufret</b> , Cabinet du Directeur Général, Assistance Publique - Hôpitaux de Paris
09.35	<b>Keynote talk</b>	<b>Philippe De Backer</b> , European MEP (tbc)
<b>09.50</b>	<b>Theme: A trustworthy ecosystem for reusing health data for research</b>	
09.50	The EHR4CR Champion Programme	<b>Mats Sundgren</b> , Principal Scientist AstraZeneca R&D
10.10	Accelerating clinical research in Europe: the InSite platform	<b>Brecht Claerhout</b> , CEO Custodix
10.25	Privacy protection: the European legal landscape	<b>Nikolaus Forgo</b> , Chair of IT-Law and Computer Science, University of Hannover
10.45	Ensuring trust when reusing EHRs for research	<b>Dipak Kalra</b> , President i~HD
11.00	COFFEE BREAK (including software demonstrations)	
11.30	EuroRec's role in certifying service provider platforms	<b>Pascal Coorevits</b> , VP for Research EuroRec
11.45	Governance codes of practice	<b>Peter Singleton</b> , Cambridge Health Informatics
12.00	EMIF: opportunities and governance of federations of big data	<b>Bart Vannieuwenhuysse</b> , Senior Director Health Information Sciences Janssen
12.20	The value to patients and to health care from reusing data for research	<b>Petra Wilson</b> , CEO International Diabetes Federation
12.40	LUNCH - Buffet, posters, videos and demos	
13.40	<b>Keynote talk</b>	<b>Mary Baker</b> , past President European Brain Council
<b>14.10</b>	<b>Theme: High quality interoperable health data for care and research</b>	
14.10	The healthcare need for better integrated health data	<b>Michèle Thonnet</b> , French Ministry of Health (tbc)
14.25	Panel discussion: The role of decision makers in promoting and supporting better learning from health data Moderated by <b>Veli Stroetmann</b> (Head of eHealth and Policy Research, empirica, Germany)	<u>Ministry perspectives:</u> <b>Michèle Thonnet</b> , French Ministry of Health (tbc) <b>Jeremy Thorp</b> , Business Architecture Director, UK Health and Social Care Information Centre (tbc) <u>Clinical and patient perspectives:</u> <b>Robert Vander Stichele</b> , GP and Senior Researcher Department of Pharmacology, Ghent University <b>Petra Wilson</b> , CEO International Diabetes Federation <u>Insurer perspective:</u> <b>Christoph Rupprecht</b> , Head of healthcare policy and health economics, AOK Germany
15.30	COFFEE BREAK (including software demonstrations)	
<b>16.00</b>	<b>Theme: I~HD: its constitution and services</b>	
16.00	Benefits to hospitals from high quality EHR systems and high quality health data	<b>John O'Brien</b> , former CEO St. James's Hospital, Ireland
16.20	i~HD: its constitution and services The Network of Excellence for hospitals	<b>Dipak Kalra</b> , President i~HD
16.40	Cocktails and canapés (Walk around the demos, Networking opportunities)	
18.00	Close	

**“A trustworthy ecosystem for reusing health data for research”**

**“High quality interoperable health data for care and research”**

**“Discover the benefits of joining the i~HD network”**

**“Grow your reputation as a centre of clinical excellence”**

**“Find out how to access new tools and services for research”**

**“Find out how better interoperability can deliver learning health system benefits”**

## About the conference

**i~HD** is a not-for-profit European institute, with a mission to guide and catalyse the quality, interoperability and trustworthy uses of health data, for optimising health and knowledge discovery.

The role of **i~HD** is to provide independent governance oversight of clinical research platforms and services, as these expand to connect with multiple hospitals across Europe. The conference will present the EHR4CR platform and its pharma-led adoption programme, and detail the **i~HD** governance services that reflect state-of-the-art in the **trustworthy re-use of health data for research**. You will also learn about Europe's largest "big data" project in health: EMIF (European Medical Information Framework). The views of patients on the benefits of reusing their data for research will be presented by Mary Baker, past President of the European Brain Council, one of our keynote speakers.

This Inaugural Conference will mark the parallel launch of a novel European platform to support multi-centre clinical research. This operational platform, the result of the European project EHR4CR (Electronic Health Records for Clinical Research), can connect securely to the data within multiple hospital EHR systems and clinical data warehouses across Europe, to enable a trial sponsor to predict the number of eligible patients for a candidate clinical trial protocol, to assess its feasibility and to locate the most relevant hospital sites.

The conference will also spotlight the challenges and state-of-the-art approaches to improving the quality and **semantic interoperability** of clinical data. **i~HD** will play an important future role in the development and quality labelling of semantic interoperability standards, bringing together clinical and research domain experts, with patients, to help ensure that future standards support patient care, learning health systems and clinical research.

### Who should attend

- healthcare providers from across Europe
- representatives of the pharma industry
- patient associations
- health professional associations
- the health ICT industry
- standards bodies

### Website & registration

[www.i-hd.eu/ic2016/](http://www.i-hd.eu/ic2016/)

### Hosted by

Assistance Publique -  
Hôpitaux de Paris  
INSERM  
UPMC

#### Venue:

**Campus des Cordeliers**

UPMC

15, rue de l'école de médecine  
75006 Paris
